

**February 11, 2026**

## **RECALL PRESS RELEASE**

CS Beef Packers in Kuna, ID (Establishment 630) is a federally regulated beef processing facility and has 10 full time USDA, FSIS Inspectors/Supervisory staff on premises during production hours closely monitoring each step of the process ensuring that the company adheres to all federal rules and regulations.

In an abundance of caution and at the request of USDA, Food Safety Inspection Service, CS Beef, Est. 630 is recalling the following ground beef products with production date of 01/14/26:

- 18601 Coarse Grind Beef 73L, 10 lbs chubs
- 19583 Fine Grind Beef 73L, 10 lbs chubs
- 19563 Fine Grind Beef 81L, 10 lbs chubs

The products above had a "Use/Freeze By date" of 2/4/2026 and went to restaurants through foodservice distribution channels. All were produced under USDA, FSIS Federal Regulations and under USDA, FSIS Supervision and all raw materials tested Negative for E. coli O157:H7. Each lot yielded acceptable results with no pathogen being found. The issue was discovered due to FSIS testing at a downstream customer a few weeks after production which showed presence of E. coli 0145.

CS Beef Packers abides by a robust Hazard Analysis Critical Control Point program that effectively addresses all food safety aspects of the manufacturing process as per FSIS Federal Register Notices. This is further verified by multiple in-house audits and independent 3<sup>rd</sup> party audits.

There have not been any reports or complaints of illness or injuries resulting from the consumption of the products identified above. The CS Beef plant is one of the newest, most modern, state of the art, harvest facilities in the nation which has over 800 valued team members.
